OBJECTIVE:

Experienced UNIX / Linux System Administrator with Cisco CCNA training. I have supported a large R&D organization. I have also supported a software development organization and production environment. Looking to obtain a UNIX Systems Administrator / Network Administrator position where I can use my extensive Sun Solaris and Linux Administration experience.

SKILLS:

- Combined multiple NIS domains into a single corporate NIS domain to eliminate duplication and reduce inefficiencies.
- Migrated 3 data centers into a single data center at the new corporate office building while minimizing end user downtime.
- Provided system support for the migration of an internally developed product tracking system onto a new hardware / database client server platform. Provided this support for both the software development team and the production environment.
- Performed installation, configuration, monitoring and troubleshooting of Sun Solaris Servers, Red Hat Linux Servers and Sun Solaris.
- Was instrumental in migrating users from individual UNIX workstations to a shared UNIX environment (GoGlobal) running on large multiprocessor Sun Servers.
- Supported a Linux and Solaris compute farm to better utilize computing resources.
- Provided end user support to a user community consisting of Integrated Circuit Designers and Product testing engineers.
- Maintained a clustered pair of file servers (Network Appliance NAS devices) that provided a highly reliable centralized software tool repository for the engineering community.
- Completed Cisco CCNA and Comptia Network+ training.
- Participated in a software development team that developed a product tracking system for integrated circuit production cleanrooms.
- Programmed an interface between cleanroom production equipment and the product tracking system.

TECHNICAL EXPERTISE:

Hardware: Sun, Network Appliance, EMC, HP, Cisco

Operating Systems: Sun Solaris, Red Hat Linux, Cisco IOS, Network Appliance DataOnTap, Microsoft Windows XP & Vista.

Software: Shell scripting, perl, NIS, NFS, CIFS, TCP-IP, HTML, XHTML, CSS, PSP, MySQL, Apache, Samba, Microsoft Office suite.

WORK HISTORY:

Maintech. Allentown, PA **2008-2009**
Systems Administrator – In support of **Agere Systems / LSI.**

Maintech, Bethlehem, PA 18017 **2006-2008**
Support Administrator – Proactive Support Center (PMC).

Hewlett Packard Services, Allentown, PA **2002–2005**
IT Specialist V – in support of **Lucent Technologies / Agere Systems.**

IBM Global Services, Allentown PA **1996 – 2002**
IT Specialist (Systems Administrator) – In support of **Lucent Technologies.**

AT&T Microelectronics (Lucent Technologies), Allentown, PA **1987 - 1996**
Member of the Technical Staff.

EDUCATION:

MS – Information Systems – DeSales University Center Valley, PA

BS – Computer Science – DeSales University Center Valley, PA

AAS – Electronics Technology Lehigh County Community College Schnecksville, PA

PROFESSIONAL DEVELOPMENT AND TRAINING:

Completed Cisco CCNA training class at New Horizons, Bethlehem, PA

Completed CompTia Network+ training class at New Horizons, Bethlehem, PA

Systems Administration and Network Security (SANS) Level 1 track

Several Sun Solaris Administration classes

Linux Administration for experienced Administrators

Web Programming class (XHTML and CSS)

Dynamic Web Programming with PSP and MySQL
